# React.js challenges

Make the following apps:

1.

Let's go all the way up.

Create a simple counter button that will increment every time it is clicked.

1.5.

Bring it back now y'all.

Now we need a button to decrement the number when it is clicked.

0

Increment   Decrement

(Hint: you might need to split the value being changed from the increment button)

2.

All together now.

Let's create a calculator. Simples.

	0		
clear			÷
7	8	9	−
4	5	6	+
1	2	3	=

3.

Call me maybe?

Create a simple address book that you can add phone numbers to. It should show the numbers in a list if any have been entered.

Enter here

11112

3333

11111111112fffff

Show here

4.

What's love got to-do.

Make a to-do list app. You should be able to add and remove items.
